# Construction Notice

**NE Dayton Contract 2, Area 3, 4, & 6 Street and Utility Improvements  
Contractor: S.R. Wiedema**

**Subject: Yard grading and seeding will begin this week.**

## **GENERAL PROJECT INFORMATION:**

- Monday of next week, Wiedema will be tilling up the black dirt in preparation for seeding.
- The seeding and hydromulching will occur a short time after soil preparation.
- It is the contractor's responsibility to make sure the seed is established. Once the seeded area is established by the contractor, a written notice will be provided to the property owner stating they are now responsible for maintaining the seeded area.
- Some residents have lawn irrigation systems in their yards. If you install your system before the seeding contractor installs the seed, your system could become damaged. If you choose this option, please **CLEARLY** mark your irrigation heads so the contractor can work around them. If you choose to install your system after the seeding takes place, it will be your responsibility to repair damaged areas of your yard due to sprinkler or landscaping installation.
- The above schedule is very weather dependent, wind and rain can have a significant effect on seeding. Please be patient with minor variations to the schedule.
